

Experience

StoneRidge Resort Development

StoneRidge Motor Coach Subdivision Project

- Conceptual design of the development area for a capacity of at least 100 motor coach sites varying in size with an average being 50' in width by 100' in length.
- Design of the internal roadways, parking and building footprints for development.
- Utility infrastructure design for development including water, sanitary sewer, storm sewer, power, phone and cable.
- Fire hydrant design and placement within and around the facility to comply with local fire department requirements.
- Construction engineering and observation

Stakeholders:

- StoneRidge Resort Development

Key Staff Members:

- John J. Karpenko, P.E., Project Manager
- Gerry Hoggatt, Staff Design Engineer
